DETAILED ACTION

This is a response to the Amendment received on July 31, 2003. Claims 1-4 are pending.

Priority

Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Japan on March 29, 2001. It is noted, however, that applicant has not filed a certified copy of the 2001-095450 application as required by 35 U.S.C. 119(b).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(e) as clearly anticipated by Asai et al. (U.S. Patent No. 5,779,548; hereafter "Asai").

Asai discloses the video game program causes the computer to execute a generating procedure that, when the direction key is operated by the player, corrects the input direction by an angle to generate a corrected direction as a progress direction of the character is a 3D space; a first character movement controlling procedure that move the character in the progress direction in the 3D space; storing procedure that stores the progress direction; a determining procedure that determines whether an identical direction is input from the direction key continuously; and a second character movement controlling procedure that, when if it is determined that the identical direction is input from the direction key continuously, moves the character in the stored progress

Art Unit: 3714

direction in the 3D space regardless of movement of the line of sight (abstract, Figures 14-15 and 18; 9:15-55).

Claims 2-4 correspond in scope to a recording medium, a method of controlling movement and an apparatus set forth for use of the video program listed in the claim above and are encompassed by use as set forth in the rejection above.

Response to Arguments

Applicant's arguments with respect to claims 1-4 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Slye et al. (USPN 5,261,820) discloses altering the viewpoint of a stored game.
